## What is a SMART<sup>®</sup> Health Card?

- ✓ Holds important vaccination or lab report data
- ✓ Can be scanned to verify that the information has not been tampered with
- ! **Don't forget** - scanning this QR Code will share all of the information on your Vaccine Card, so make sure to only share with those you trust.

This vaccination record is powered by SMART and works with any app or service where SMART Health Cards are accepted. For more information, please visit <https://smarthealth.cards/>.

The IAL number on this document describes the way that your identity information was collected at the clinic. You can find more information about IAL encoding here:  
<http://build.fhir.org/ig/dvci/vaccine-credential-ig/branches/main/ValueSet-identity-assurance-level-value-set.html>

Your record can be verified or imported into the app of your choice by scanning the QR Code at the top of the page.
